

# alliance

Enhancing excellence and innovation capacity in sustainable transport interchanges

The scope of ALLIANCE is the enabling of stimulating and strengthening the scientific and technological capacity of Latvia and the raising of the profile of the research staff and their institution, by providing knowledge in the field of smart interconnecting sustainable transport networks.

<http://alliance-project.eu/>

ALLIANCE is oriented to intermodal passenger and freight transportation systems taking into account legal and organizational aspects, interaction with other domains, such as spatial planning and economic development, identifying smart and sustainable solutions for achieving smooth and seamless transportation, and exploiting decision-making strategies, methodologies and techniques for assessing and evaluating the impact of these solutions on the transportation domain, the economy and the society.
